

About Aero One Aero One is the maintenance, repair, and overhaul (MRO) solution designed to extend the functionality of SAP® Business One to the specific business and operational requirements of small- and mid-sized aviation services.

Aero One Value Aero One is an add-on to SAP Business One, SAP's affordable and easy-to-use business management solution for growing companies. It integrates financials, sales, customer, and operational data with fleet management, MRO and production planning, and regulatory requirements. It specifically helps MRO component services, providers, OEMs, operators and part suppliers to improve asset utilization and reduce operational costs by enhancing repair management activities, reducing inventory, and optimizing fleet operations. Developed by 2MoRO, Europe's leading provider of MRO solutions for the aerospace industry, AeroOne is sold and implemented in the US by B4 Consulting, which has the SAP implementation experience and expertise to accelerate the time-to-value of AeroOne.

Aero One Features Aero One is a single solution that drives cost-savings opportunities for aviation control, inventory and availability. The solution's capabilities include:

- Tracking and managing parts at the serial number level
- Analyzing maintenance visits and tasks
- Automated service orders
- Importing and maintaining Illustrated Parts Cards (IPCs)
- Minimizing spare parts and parts provisioning
- Integration of flight schedules and MRO
- Listing service bulletins and airworthiness directives
- Repair Information Cockpit that overviews repair processes
- Integration and printing of regulatory documentation
- Automatic margin calculations

Aero One Services B4 Consulting provides a one-stop solution experience with comprehensive pre-sales, implementation, and ongoing support and maintenance services including:

- Business process assessment: determines requirements
- Financing: supports Aero One success
- Fixed implementation cycle: aligns with customer schedules
- Preconfigured database: advances rapid implementation
- Project management: ensure success and minimizes business disruption
- Training: on-site for end-users
- Support: go-live and post-go-live
- Ongoing support: B4 Consulting Application Management Services (optional)
