

ELO Product Comparison

ELOenterprise · ELOprofessional ·
ELO DMS Desktop · ELOoffice

ELO product comparison: The right solution for every need.

The comprehensive and powerful ELO product portfolio adds value to your business processes. ELO has an effective enterprise content management (ECM) solution for your company, no matter what the size or industry.

These solutions cover the needs of businesses of all sizes: from the introductory DMS solution **ELOoffice**, designed for small businesses and independent contractors, to the modular client-server solution **ELOprofessional** for SMEs through to **ELOenterprise**, the platform-independent high-end solution for large companies. ELO also offers **ELO DMS Desktop**, which integrates the ELO functions directly into popular Microsoft Office applications (Outlook, Word, PowerPoint, Excel), giving you direct access to your business documents.

Here is an overview of the individual ELO product lines and a comparison of their main functions.

The ELO product family

The high-end solution **ELOenterprise** is platform-independent, highly scalable, as well as multi-client capable and is especially powerful when utilized by data centers and for portals. This makes **ELOenterprise** perfect for implementation in large companies and corporations. The service-oriented architecture (SOA) of **ELOenterprise** allows for the optimal integration of the ELO ECM functionality into company-specific business processes.

ELOprofessional is a modular client/server solution designed to suit the needs of SMEs. The software's flexibility ensures that it can be optimally adapted to your company's requirements. The familiar look and feel of the filing system means that employees will get up to speed with the program with little or no training. In addition, the system allows simple integration of all applications already used at the company (such as Microsoft products, as well as CAD or ERP systems).

ELO DMS Desktop integrates ECM into Microsoft applications (Word, Excel, PowerPoint, Outlook), accommodating work style preferences and enabling the user to effortlessly manage business documents. Other notable features of **ELO DMS Desktop** include the ability to drag and drop documents, edit version-controlled documents filed in accordance with rules on storage of documents, and a powerful search function.

ELOoffice is the ideal document management solution for small companies or individual workstations. **ELOoffice** helps you optimize and automate your work processes by managing all documents in digital form (Office files, e-mail, invoices, delivery notes, faxes, etc.) in a flexible and user-friendly file structure. The standard package provides integration in Microsoft Office (e.g. Microsoft Outlook) **ELOoffice** is also ideal for remote working.
